

Patient Testimonial

Name Ellison

Age 15 mos.

Date 12/30/09

City Salt Lake City, UT

1. *What brought you to see Dr. Matt?*

Ellie came to the office with me, and after talking with Dr. Matt about her difficulties with feeding he determined she might benefit from treatment as well. As we continued to talk he also determined that her difficulty crawling (at the time she was 7-8 months old) could also be helped through treatment.

2. *What treatment did you receive?*

Dr. Matt adjusted Ellies hips, back and skull/head 1 time per week for about 6 months after that.

3. *How did Chiropractic help you?*

We noticed a difference in Ellie's eating and swallowing immediately after beginning treatment with Dr. Matt. Ellie's mobility and tolerance for being on her hands and knees (crawling posture) also increased she is now eating and walking as would be expected for a child her age.

4. *Comments:*

We love Dr. Matt! He really helped Ellie, and we are really sad that our new baby, Jack, will not have the benefit of Dr. Matt's care.
